ABOUT THE CONFERENCE:

Neonatology is a subspecialty of paediatrics that consists of the medical care of newborn infants, especially the ill or premature newborn infant. It is a hospital-based specialty and is usually practiced in neonatal intensive care units (NICUs). More than half of the neonatal problems & deaths are related to the gastrointestinal system. So we would like to enlighten everybody involved in the care of neonates with evidence-based medicine in gastroenterology.

Starting from breast feeds to necrotising enterocolitis to surgical interventions for various surgical disorders, oncological problems in a neonate to the metabolic problems in a neonate due to digestive problems of proteins, carbohydrates & fats will be discussed by the experts in this national conference.

In our 10 years of success at Cloudnine Group of Hospitals, gastrointestinal problems predominate in neonates which can have impact on their intact survival, hence we want to offer the best in neonatal education in India to make neonatal outcomes one of the best in the world. Hence it is only fair that we have joined hands with Vydehi Institute of Medical & Research Institute to bring you the latest and most recent developments in the world of neonatal care.
